

## **Baseball Position Player Interval Throwing Program**

- Program performed 3-4x per week with a rest day between and ice after each session\*
- All throws should be on a line (not max effort) with none rising over 10 ft high
- Weekly videotaping of throwing is helpful to assess maintenance of delivery and form
- A warm-up period of jogging followed by full body stretching is expected prior to begin throwing

**\*Progression to advance to next level stage of program requires no medial elbow/shoulder pain/stiffness and maintenance of strength/form during final set\***
